The Unduplicated Count represents the total number of different students served by the College in a given fiscal year. A year was defined as Fall, Spring, Summer I, Summer II, and a student was counted once per year if he or she attended any combination of semesters. Only students enrolled after the semester 20% date are included. The New Student Count represents the number of different students served, throughout the history of the College. A student was counted once upon entering the College for the first time.
