Management of Computer Information Technology

Turn Your Tech Savvy and Business Sense into an Exciting Career

Businesses and organizations heavily rely on technology to manage everything from websites and databases to e-marketing campaigns and telephone service. Individuals with strong programming, networking, database and data communication skills who can choose systems to best meet a company’s needs and finances, as well as manage workers, are in high demand in Philadelphia. The degree in Management of Computer Information Technology gives you a strong foundation for a bachelor’s degree and a rewarding career.

“Employment of computer and information systems managers is expected to grow 18 percent from 2010 to 2020.”

The program parallels the first two years of several four-year information technology curriculums in the Philadelphia region, easing your transfer to a four-year college or university.

Career Paths

Whether you already work in the field or are just starting out, a degree in Management of Computer Information Technology will prepare you for a bachelor’s degree and a career as a computer or information systems manager. Depending on the job, the necessary level of education varies. Some graduates with an associate’s degree can obtain a position as a computer support specialist or manager, and other managerial positions require a bachelor’s degree or prefer individuals with a master’s degree.

Chances are if you are interested in or work with computer or information systems, you thrive on meeting tight deadlines, solving problems and making big decisions. This program offers you the information technology and business background necessary to pursue a four-year degree in Information Systems, Technology Management or Business Administration.

With the Management of Computer Information Technology program, you will study a broad range of topics:

- PC applications and operating systems
- computer programming
- data communications
- server operation and security
- systems analysis
- database management
- financial and managerial accounting
- management and marketing principles
With this degree, you also have the flexibility of working in a number of industries, including:

- computer programming, systems integration or data processing services
- insurance and financial firms
- government agencies
- manufacturing companies
- educational institutions

Salaries
Computer and Information Systems Managers: $71,420 to $166,400
