Exoring how technical, scientific and societal changes interrelate in the modern world is the focus of the Culture, Science and Technology program, which will lead you to further study and a career in the health, information technology or science fields. This degree provides a great start for students who want to explore their career options and transfer to a four-year program or for those who want to prepare for a specific associate’s degree program.

“Health care professionals, engineers, computer specialists and science technicians are part of the largest sectors of anticipated employment growth through 2018.”

To meet your educational and career needs, the Culture, Science and Technology program offers a choice of two tracks:

- **Health Careers concentration** — for students who want to pursue a public health, physician’s assistant or occupational therapy program, or choose from an array of health care programs. This concentration will best help you move into one of the College’s allied health programs, including Nursing and Dental Hygiene.

- **Science/Technology concentration** — for students interested in science, engineering, information technology or science technician careers. Students could transfer to a number of programs at the College, including Applied Science and Engineering Technology, Science, Computer Information Systems – Information Technology and Education – Secondary Math/Science option.

**Career Paths**
The Health Careers concentration will help you to move into a number of the College’s health care programs that directly lead to careers after graduation:

- Clinical Laboratory Technician
- Dental Hygiene
- Diagnostic Medical Imaging
- Nursing
- Medical Assisting
- Patient Service Representative
- Respiratory Care Technology

In addition, you may earn a health-related degree or a Culture, Science and Technology degree and transfer to a four-year college or university.
The Science/Technology concentration also offers the benefit of moving to another associate’s degree program at the College, such as Science, Engineering Science or Computer Science. You may also complete the Culture, Science and Technology degree for a well-rounded start to a bachelor’s degree. Any of these degrees will prepare you for a four-year program in a related field.

**The Culture, Science and Technology Program**
This program allows you to examine different areas of interest, giving you the flexibility to adjust or change your educational direction. The College’s transfer agreements and Dual Admission programs help you smoothly transition into a four-year program, and you may qualify for scholarships upon transfer.

**Salaries**
- Civil Engineer - $76,590*
- Clinical Laboratory Technician - $36,030
- Computer Support Specialist - $44,300
- Dental Hygienist - $67,340

**Areas of Study**
This program offers a variety of courses in the humanities, natural sciences, social sciences, mathematics, health care and technology.
